

Our Aims and Objectives

Our aim is to provide the highest quality nursing care for men and women who suffer from such mental conditions as Dementia and Alzheimers Disease and who may also have physical support needs.

Our clear objective is to address health, emotional, social and psychological needs with the overall aim of providing quality assured care for each individual client.

Care tailored specifically for each client
Through our General Policy and Procedure of Care Policy, Individualised Care and Keyworker System, our care delivery can be tailored specifically to meet the needs and requirements of our clients.

Our philosophy is directed as far as possible to enable our clients to live an independent normal and satisfying life.

Clients are encouraged to uphold their right to exercise choice on a wide range of issues that directly or indirectly affect them, therefore playing an active role in controlling their lifestyle.
